

THE ORIGIN OF THE ZAMZAM WELL

PART 3

Hajar made a basin for the spring and collected some water in the goatskin container for her and the infant Ismail. The water continued to bubble up unchecked. The Angel said, "Fear no loss, for this is the site of Allah's House which the boy and his father shall build..."

The area around the small pond of Zamzam flourished in the years to come. Passing by trade caravans stopped at it, not believing their eyes and some stayed there. Hajar was now the owner of the well, and thus Allah the Most Merciful did not let them perish.
